Abstract (en)

[origin: WO2012025324A1] The invention relates to a hand-held machine tool, comprising a housing (36) and a drive unit, a gearbox unit which is provided to convert a rotary motion of the drive unit into an oscillating motion (10) and has an output shaft (12), and a tool holder (14) for fastening at least one tool (16), said tool holder being drivable in an oscillating manner via the output shaft (12) the gearbox unit. According to the invention, the hand-held machine tool comprises a clamping collar (18), which extends in a circumferential direction (20) at least partially around the output shaft (12).
