Abstract (en)

[origin: WO2012025226A1] The invention relates to an electrolytic bath for electrodeposition containing nickel salt, phosphoric acid, phosphonic acid, and boric acid in solution. The invention further relates to a method for producing an electrolytic bath comprising the following steps: a nickel salt, phosphoric acid, phosphonic acid, and boric acid are mixed; and nickel carbonate is added in order to increase the pH value.
