Abstract (en)  
[origin: WO2012025370A1] The invention relates to a water-conducting domestic appliance (1) which is used in particular as a laundry-treatment apparatus for washing and/or drying laundry. The appliance comprises a housing (2), a door (3) which can be connected to the housing (2) and by means of which a treatment region (4) inside the housing (2) can be accessed, and a door closure (5). The door closure (5) is used to close the door (3). Further provided is a ventilation valve (6) which is used to control ventilation of the treatment region (4). The ventilation valve (6) is closed during operation when the door (3) is closed.
