Abstract (en)
[origin: WO2012025201A1] The invention relates to a rail fastening system (1) for fastening a rail (2) to a crosstie (3) of a track system in a friction-locked and elastic manner, comprising at least one angular guide plate (5) that can be fastened to the crosstie (3) by means of at least one fastening element (4) and at least one tension clamp (6), wherein in the finally assembled state of the rail fastening system (1) the tension clamp (6) presses on the rail foot (7) with at least one section (6') and thus fastens the rail (2) to the crosstie (3), wherein an isolating element (8) is arranged between the at least one section (6') of the tension clamp (6) and the rail foot (7).
