Abstract (en)  
[origin: WO2012025558A2] The invention relates to a refrigeration device comprising a housing and a cross member (301) that connects a first housing side wall (303) to a second housing side wall on the front side of the housing. A first end (305) of the cross member (301) can be fastened by means of a latch in a latching receptacle (307) of the first housing side wall (303).
