Abstract (en)

[origin: EP2423888A1] The device i.e. mouth piece (5), has a base body (9), a support surface (11) for applying a bank note to be guided, and a lateral positioning flank (12) for lateral positioning and/or connecting the device to a bank note processing device. An adjusting unit variably adjusts a position of the flank transverse to a guiding direction of the bank note. The adjusting unit includes an adapter element (18) adjustably mounted on a mounting surface i.e. wedge surface, of the base body and adjustable by moving on the mounting surface transverse to the guiding direction.
