Abstract (en)
[origin: EP2610184A1] The invention is applicable to sheets susceptible to being made from paper. It has one manufacturing roller of said sheets (6). It has one table (1) that receives blocks of sheets of paper by means of parallel channels (8) in which at least two pluralities of blocks of sheets of paper are guided, each one of these with blocks of sheets of paper adjacently positioned, towards the end area of a table (1) from which they are deposited onto a transportation machine (7) that receives blocks of sheets of paper (3) with a predeterminable number of sheets of paper; this transportation machine (7) having a longitudinal series of pushers (4) that displace various blocks of sheets of paper (3) by means of dragging on a surface of said transportation machine (7) carrying them to the packaging machine (5).
