Abstract (en)
It is ensured that in the case where an elevator is used for evacuation purposes during a fire, an operator in a car can easily grasp, from a monitor in a car, various kinds of information necessary for rescuing those who are present in a building. This monitor control apparatus is provided with a car 1 which ascends and descends in an elevator shaft, a monitor 8 provided in the car 1, indication control means 18 which controls indications of the monitor 8, a camera 5 installed in a hall of an elevator, a fire detector 4 which detects the outbreak of a fire, and operation control means 16 which controls a normal operation of the elevator and an evacuation operation of the elevator during a fire. The indication control means 18 causes the monitor 8 to automatically indicate prescribed evacuation information including an image of the hall photographed by the camera 5 and , information on the floor where the outbreak of a fire has been detected by the fire detector 4, when the control of an evacuation operation is started by the operation control means 16.
