Abstract (en)
[origin: EP2610207A1] The crane has a crane body (7) with a crane boom (8), a rotary column (12) incorporating the crane boom and a receiving device (14) for carrying the rotary column. The crane body is made of an associated carriage (4), and essentially incorporated on a transport vehicle (1) driven on the roads. An adjustable supporting beam is provided with eleven legs (16) on free ends, where supporting beams (15) are attached to the receiving device. The crane body is alternatively aligned for incorporating on the carrier that is incorporated on a set of three heavy duty rollers.
