Abstract (en)

A washing and/or drying device (C) of the present invention comprises at least one body (G); at least one panel (P) engaged to said body (G); at least one inclined surface (1) provided in the lower part of the panel (P); and at least one slot (2) which is positioned on said inclined surface (1) and to which at least one connection element (3) fixing the panel (P) to the body (G) is engaged. Thanks to the device (C) of the invention, the assembly of the panel (P) to the body (G) is able to be performed practically and easily without using any external part. Moreover, with the device (C) of the present invention, the slot (2), in which the connection element (3) is engaged, is not seen when looked from the opposite, and thus aesthetic view of the device (C) is improved.
