Abstract (en)

[origin: EP2610397A1] The invention relates to a laundry dryer comprising: a front frame (30) extending from a base region to an upper region at the front region of the dryer; a laundry storing compartment adapted to receive laundry to be treated; a front wall (8) of the dryer which is at least partially supported by the front frame (30) and comprises a loading opening for loading laundry into the laundry storing compartment; an upper front panel (12) of the dryer which is at least partially supported by the front frame (30); a laundry treatment unit adapted to provide an agent for the laundry in the laundry storing compartment for treating the laundry; a liquid reservoir fluidly connected to the laundry treatment unit for supplying liquid thereto; and a liquid inlet port adapted for manually filling the liquid reservoir with liquid and which is arranged at an upper front section of the dryer. According to the invention, the upper front panel (12) has a panel window (44, 46) which provides an access opening for servicing or for exclusively servicing the liquid reservoir and which is arranged at a position such that the panel window (44, 46) exposes the inlet port for filling the liquid to the inlet port through the panel window.
