Abstract (en)

The invention relates to a method for renovating an original building positioned on an original first foundation (1), which method comprises at least the steps of forming a new second foundation (4) adjacent to the original first foundation (1), on the outside of the original building, and arranging a wall cover on said new foundation (4) to cover at least some of the original walls of the original building, the wall cover comprising wall elements (5) and extending at least up to the level of the uppermost ceiling of the original building. The method may also comprise the additional step of adding storeys to the building. Preferably, the wall elements and additional storeys are made of metallic cellular board.
