Abstract (en)  
[origin: EP2610424A2] The door (1) has a profile section (12) provided in a cross-section, and another profile section (14) attached to the former profile section. A running rail (17) for a door leaf is arranged in the latter profile section, where the rail divides an upper surface (22) of the latter profile section into partial regions (23, 24) and is projected in a vertical direction over a single-piece profile body (11). The partial regions are bent and connected with each other and opposite to a horizontal plane and extended up to vertical rear-front surface (25) of the profile body.
