Abstract (en)
[origin: EP2610425A2] The element (2) has two flat glass sheets (4) aligned plane-parallel to each other, where a gas-filled intermediate space limits the flat glass sheets. An integrated light source (10) e.g. lambert radiator or e3 plasma lamp, is arranged in a peripheral portion (12) of the element, and emits operation light into the space. The light source possesses an elongated shape, and is aligned parallel to an edge (20) of the element, where the light source possesses a continuous emission spectrum with electronic adjustable color temperature.
