Abstract (en)

[origin: EP2610816A1] A Vehicle Unit, VU, is provided having a front end. The front end comprises a connection port and a space where the space is covered by an access panel. The access panel comprises an integrated antenna which is arranged to be connected to a processing unit. The integrated antenna is further arranged to be connected, via the processing unit, to the connection port, and the integrated antenna is also arranged to wirelessly send signals to and receive signals from an external device.
