Abstract (en)
[origin: WO2012028548A1] The invention relates to an industrial truck having at least one lift mast and a load-bearing-means carrier, which is arranged on the lift mast and can be moved vertically in relation thereto, and an antenna, which is arranged in the region of the lift mast and is intended for wireless communication with an identification system, in particular with RFID transponders, wherein the antenna (20) is arranged on the surface of that side of the lift mast (1.1, 1.2) which is directed towards the load, or it is integrated in the surface of the lift mast (1.1, 1.2), wherein the antenna (20) is designed as a multiple antenna.
