Abstract (en)

[origin: WO2012030216A1] The present invention relates to a washing device and method for washing objects such as hands. The washing device comprises: - a washbasin provided with a wall at least partially enclosing a washing space, and an opening for inserting an object for washing; at least one liquid outlet arranged on or close to the wall; at least one air opening arranged on or close to the wall for extracting and/or supplying air, and airflow means connected to the air opening for discharging and/or supplying air; air feed means connected to the air outlet for supplying air to the air outlet; - liquid feed means connected to the liquid outlet for supplying liquid to the liquid outlet; and liquid discharge means for discharging liquid.
