Abstract (en)

[origin: WO2012028990A1] The invention relates to an operating device for a domestic appliance, which has an operating element (2) and a display unit (17), wherein there is only one operating element (2), which can be turned in discrete stages, and an operating mode (5 to 15) of the domestic appliance is respectively characterized by the stages and can be selected by setting the stage of the operating element (2), and there is only one operating unit (16), arranged adjacent to the operating element (2) and having touch-sensitive operating areas (18 to 20), with which an operating parameter associated with the operating mode (5 to 15) selected by the operating element (2) can be set in terms of its value. The invention also relates to a domestic appliance comprising a corresponding operating device (1) and to a method for operating an operating device (1) for a domestic appliance.
