Abstract (en)

[origin: WO2012028469A2] The invention relates to a refrigerator, in particular domestic refrigerator, having a basic structure, which defines a refrigerating chamber, having a carrying element (7), on which is fastened a condenser (5) which is connected into the refrigerant circuit, and having at least one evaporation pan (23, 24), for collecting condensation water which forms in the refrigerating chamber. According to the invention, the carrying element (7) of the condenser (5), in order to be formed as evaporation pan, has a tray base (23) and laterally elevated side walls (24) around the periphery.
