Abstract (en)

[origin: WO2012028461A1] The method according to the invention (S1 to S4) is used for processing data in a domestic appliance (1), wherein the method has at least the following steps: appliance data from the domestic appliance (1) are ascertained (S1), at least some of the ascertained appliance data are incorporated (S2) into a user profile, and at least some of the user profile is provided (S3) for information purposes. The domestic appliance (1) according to the invention is set up to perform the steps of the method according to the invention which relate to the domestic appliance (1). In the system according to the invention comprising a domestic appliance (1) and at least one external unit (7), the domestic appliance (1) and the external unit (7) are set up to interact in order to carry out the method according to the invention.
