Abstract (en)
[origin: WO2012030291A1] A connector for termination of at least two incoming and pairwise twisted wires is shown comprising a spreader (5) connectable to a cable terminator (4), the spreader having contact pins (19) embedded in a dielectric material, the contact pins extending through the spreader and in at least a part of its extension having a radial direction. The spreader is further separable into at least two parts, the parts comprises paths arranged for the contact pins.
