Abstract (en)
[origin: WO2012028572A1] The invention relates to a method for charging an electrical battery (2) having a given charge capacity, the electrical battery supplying power to a load (1) and the electrical battery being charged by an electrical power source (5), characterized in that the method includes a step of defining a first charge level set value lower than the charge capacity of the battery, and a step of charging the electric battery up until the first charge level set value is reached.
