Abstract (en)
[origin: EP2612980A2] The inlet element (1) has an inlet funnel (2) and an insertion element (3) which is fixable in a guide rail. The inlet funnel comprises two opposite guide elements (4a) for guiding of rods of a tank. The two opposite guide elements are arranged at the beginning of a cross-element (5). One of the guide elements, which faces a shaft journal, has a substantially semi-cylindrical cross-section. A free end of the shaft journal facing the guide element is detachably connected to the inlet funnel.
