Abstract (en)
[origin: WO2012032017A1] The invention relates to a turbojet casing adapted to receive a plurality of blades and comprising means for attaching one end of each blade to the casing (21, 30). The invention is characterised in that the attachment means extend over a surface of the casing opposite the blades, and the casing comprises holes (26) for the passage of the ends of the blades, such that the latter can engage with the attachment means of the casing. The invention also relates to a turbojet comprising such a casing.
