Abstract (en)

Disclosed is a glove comprising a fibrous glove and a coating layer of a rubber or a vinyl chloride-based resin formed on an outer surface side of the fibrous glove, wherein at least an inner surface side of the fibrous glove includes a microfiber having a diameter of a monofilament of not more than 6 µm. The glove of the present invention is not only excellent in slip resistance on both the outer surface side and the inner surface side, but also excellent in adhesion strength to rubber or resin formed on the outer surface side.
