Abstract (en)

[origin: EP2614864A1] The system (1) has a machine frame (3) for fastening machining tools and holding elements for a ski (5) or a snowboard during processing running surfaces (21) and edges of the ski and the snowboard. A motor drivable sliding surface and structure grinding disk (25) is arranged on a wagon (19). Tuning grinding disks (27) are arranged on two bottom edges of the wagon. Pot grinding disks (29) are arranged at the wagon. A determining unit determines a distance from the tuning disks and the pot disks to the ski and control axial feed motion of the tuning and pot disks.
