Abstract (en)
[origin: EP2615041A1] The pallet (0) has a base (1) including two folding boards (2a, 2b) articulated between a folded position parallel to two opposite edges of the base and an unfolded position perpendicular to a plane parallel to the base. A splash plate (4) is movable to allow the pallet to be in a deployed configuration in which the boards and the splash plate are unfolded, and a shipping configuration in which boards and the splash plate are folded up on the base plate. A double latch fixing system (5) fixes each board at the splash plate when the pallet is in the deployed configuration. The pallet includes an identification device having a radio frequency identification (RFID) antenna or a bar code.
