Abstract (en)

The object of the present invention is to provide a money handling apparatus and a money handling method capable of efficiently dispensing, as a change, money whose denomination corresponds to a calculational minimum denomination is alternatively dispensed as money of one or a plurality of denominations each of which is smaller than the calculational minimum denomination, the calculational minimum denomination being a denomination which is minimum among denominations absolutely-necessary for possible changes based on calculation in light of possible purchase sums. In the present invention, under a predetermined condition, money whose denomination corresponds to a calculational minimum denomination is alternatively dispensed as money of one or a plurality of denominations each of which is smaller than the calculational minimum denomination.
