Abstract (en)

[origin: EP2615696A1] The contact (10) has a rod (30) comprising an elongated opening (32) dividing the rod, at a certain axial distance from a base (20), into two branches (34A, 34B). Each branch successively comprises, from one end (36) to another end (37) of the rod, a first part (41) of overall decreasing thickness, a second part (42) of overall increasing thickness, a third part (43) of overall decreasing thickness, and a fourth part (44) of overall increasing thickness. Width (W) of the opening decreases in the third and fourth parts.
