Abstract (en)
A termination tool (10) for telecommunication copper wires, namely for connecting unconnected telecommunication copper wires with contacts of a distribution element and for disconnecting connected telecommunication copper wires from contacts of a distribution element, comprising a basic body (11) having a first end (12) and a second end (13), where a first connecting element (14), adapted to connect unconnected telecommunication copper wires with a first kind of distribution element contacts, is attached to the first end (12) of the basic body (11), and where a second connecting element (22), adapted to connect unconnected telecommunication copper wires with a second kind of distribution element contacts, and a third connecting element (23), adapted to connect unconnected telecommunication copper wires with a third kind of distribution element contacts, are both attached to the second end (13) of the basic body (11).
