Abstract (en)
[origin: WO2012034151A2] The invention relates to a belt buckle, which is to be attached to a belt strap and which can be detached without tools and which has an integrated container for check cards, identity cards, a driver's license, and the like, comprising a base plate (1) fastened to a belt strap end (5), wherein a frame (2) open at the top is provided on said base plate, wherein said frame is covered by means of a closing plate (3), in particular a decorative plate, on the side of the frame facing away from the base plate (1). A closing element (4) that covers the open upper face of the frame can be slid onto the open upper face of the frame (2). The closing element reaches behind the belt strap end (5) by means of the belt strap securing tab (6) of the closing element attached to the rear side and reaches over the closing plate (3) on the front face. The closing place (3) can be replaced and is designed such that a connecting element (9) for accommodating an ornamental plate (10) is arranged on the front face of the closing plate.
