Abstract (en)
[origin: GB2483682A] A spacing device for spacing a fixing surface of a furniture item from a target surface to which the furniture item is to be fixed comprises a first end 307 for contacting one of the fixing surface and the target surface, a second end 306 for contacting the other of the fixing surface and the target surface and a bore 305 dimensioned to receive a fixing means for fixing the fixing surface and the target surface together. The device is extendable along an axis of the bore 305 to set the spacing between the fixing surface and the target surface. The device may include two portions 302, 303 which include cooperating threads 304 to allow extension of the device alternatively, a deformable section or a ratchet may be used to allow extension of the device
