Abstract (en)

[origin: WO2012036552A1] A bag (1) is provided having a flexible, liquid tight, outer sleeve (2), and a flexible inner sleeve (3) extending longitudinally within the outer sleeve (2). The inner sleeve (3) is over at least a part of the length of the outer sleeve (2) connected to the outer sleeve (2) at a number of locations that are spaced apart along the circumference of the inner sleeve (3) so as to form a bracing for the outer sleeve (3). When the bag is filled with liquid, the bracing of the bag (1) allows the bag to retain a block shape.
