Abstract (en)

[origin: WO2012034773A1] The invention relates to a method for operating an injection system (103) for an internal combustion engine (101), in which, in an operating situation in which no fuel demand exists from the internal combustion engine (101), a valve (41, 61, 105) is actuated during at least one time interval in such a manner that no injection of fuel takes place, wherein a valve element is moved relative to at least one valve body (43) by the actuation of the valve (41, 61, 105).
