Abstract (en)
[origin: EP2617307A1] The helmet has two breathing mask holding devices comprising engaging portions (1) engaged with engaging portions of headbands respectively, along mating direction (31). Each engaging portion of holding device has a base plate (3) that extends perpendicularly towards U-shaped stop wall (7) having a bottom portion (11) and two opposing leg portions (9a,9b). Distance between mutually facing inner surfaces (13a,13b) of leg portions decreases towards direction of bottom portion. An opening (33) formed perpendicular to mating direction is made to face inside surface of bottom portion.
