Abstract (en)

The invention relates to a ring flip-top tube container, comprising a tube body (4) providing a space for accommodating cosmetic, a tube neck (3) and a flip-top cap including a lower flip-top cap (2) and an upper flip-top cap (1). Since the number of parts is reduced and the manufacturing process is simplified, in the process of producing the ring flip-top tube container, the use of raw material and energy may be reduced. Therefore, the ring flip-top tube container is not only environmentally friendly but also conducive to increase production efficiency and lower production cost. In addition, this ring flip-top tube container is capable of reducing the height of the cap and hence an elegant design may be executed
