Abstract (en)

The present invention relates to the field of heads (7, 107) for oral hygiene devices, which heads have a carrier (2, 102) and at least one elastic cleaning element (1, 101) attached to the carrier, wherein the carrier (2, 102) is structured such that it provides the cleaning element (1, 101) with a first bending property in a first direction and a second bending property different to the first bending property in a second direction, wherein the first direction and the second direction are different from each other.
