Abstract (en)
[origin: EP2617655A1] The container (11) has a side wall (14) attached on a container base part (12) and a container upper part (16). A closure (18) is arranged in the side wall, and comprises a latch pivoted in a plane of the side wall. A locking element is fastened at the container base part or the container upper part. The latch is engaged at the container upper part in a closing position. The latch of the closure is operated from an outer side of the side wall and changed from an open position into the closing position.
