Abstract (en)
[origin: EP2617927A2] The sliding rail arrangement (1) has a sliding rail (2) which is provided in the longitudinal direction (3). A linearly movable slider is provided for transmitting power to the door actuator. The end cap (5) secured directly to the sliding rail is covered by a fastening element (4) secured to wall, door frame or door leaf. The sliding rail is provided with recesses (10,11). The end cap is provided with a cavity (12) in which fastening element is arranged. An independent claim is included for door actuator arrangement.
