Abstract (en)

[origin: EP2618358A1] The switching unit (10) has tripping elements (20a-20c) that are actively connected for force transmission to frame sections (22) for the movement of a switching frame (30) into a switching position with respect to the movement of the tripping elements into a tripping position. A spring element (32) is provided to apply force to the frame sections along a direction of rest position of the tripping elements. An independent claim is included for a method for operating switching unit.
