Abstract (en)  
[origin: WO2012037962A1] The invention relates to a box comprising a base (12) and at least two pairs of opposing lateral walls (14a, 14b, 16a, 16b). A first of the lateral walls (16b) extends upwards from the base (12) in a vertical direction (18) at least partly only by a removal height (20) that is shorter than the height of one or more of the remaining lateral walls (14a, 14b, 16a) in order to define a lateral opening with dimensions that allow access to and removal of products contained in the box through the lateral opening. The box further comprises an insert (112) for arranging on the base (12), said insert (112) being designed dependent on the products to be received by the box.
