Abstract (en)
[origin: WO2012038295A1] The invention relates to a modular construction block. According to the invention, the modular construction block includes an injected-plastic structure (10) having an overall parallelepiped rectangular shape comprising two longitudinal walls (11, 12), two transverse walls (13, 14), and one substantially planar upper wall (15), said longitudinal walls (11, 12) defining, together with said transverse walls (13, 14) and said upper wall (15), at least one inner recess (16), wherein each of said longitudinal walls includes: a plurality of profiles (P1 to P4) extending over the largest portion of the height of the longitudinal wall (11, 12); and at least one lug (T1 to T3) extending from the base of the longitudinal wall up to a predetermined height h of the longitudinal wall.
