Abstract (en)  
[origin: EP2620073A1] The device has mold parts (1a, 1b) for rolling and shaping hairs. The mold parts are fixedly connected with each other at an end, and run in a fixed distance relative to each other. An inner surface of one of the parts (1a), which is turned towards the other part (1b), includes a heat insulating coating (3a). An inner surface of the latter part, which is turned towards the former part, includes another heat insulating coating (3c). The two mold parts are provided with respective cooling elements (3c, 3d) e.g. Peltier elements.
