Abstract (en)

[origin: EP2620079A1] The retractor has pick spring that is made to act upon mounting tool (5) during extraction of respective pull-out furniture portion (1) from associated cam (2) between base position corresponding to mounting tool in inserted state of the extendible furniture portion, and waiting position in which cam during pulling out of pull-out furniture portion is disconnected from mounting tool. Each mounting tool is coupled with and uncoupled from a brake shaft (12) by respective coupling device (30), so that brake shaft rotation is damped by damping device (14).
