Abstract (en)

[origin: EP2620194A1] The cantilever arm component (2) has a cantilever arm (4) mounted on a cantilever arm stand (3) and pivotable around a pivotal axis (5). A cantilever arm fixing device (6) fixes the cantilever arm in a selected pivotal position. The cantilever arm fixing device has an actuatable switch device which is pivotable between a release position in which the cantilever arm is movable relative to the cantilever arm stand around the pivotal axis and a fixing position in which the cantilever arm is fixed relative to the cantilever arm stand. An independent claim is included for toy derrick.
