Abstract (en)
[origin: EP2620262A1] The coupling assembly has a handle (3) comprising a tubular housing that is attached to a head (7) of circular blade (10). An articulated lever (13) is provided for engaging and disengaging a drive shaft (11) from head of circular blade. The lever is provided with a first locking cam (57) for maintaining the operating function, and a second detent cam (59) for holding and releasing drive shaft of handle.
