Abstract (en)
  A package for tobacco comprises a receptacle (610) adapted to accommodate loose tobacco and including a front side, a rear wall (614), a first (616) and a second major lateral wall opposite to each other, and a first (618) and a second (619) minor lateral wall opposite to each other, wherein an access opening (612) is provided at the front side. The receptacle (610) includes a partitioning wall (620) running essentially in parallel to the first major lateral wall (616) and dividing the receptacle (610) into a first (621) and a second partition. The receptacle (610) can be moved with respect to a closing structure (630) to expose the access opening (612) at the side of the first partition (621) or at the side of the second partition, respectively.
