Abstract (en)

[origin: EP2620573A2] The assembly has a drive lever (3) that is moved between locking and unlocking positions. The locking bolts (1,2) made of plastic are provided with bolt head (20) and drive portion (21) which is pivotally mounted on arm of drive lever. The bearing pin (5) is provided with a bearing opening. The bearing pin is connected to a cross-section reduced neck. The bearing opening is attached on head of bearing pin by applying axial force, and the bearing pin is rotated freely around the neck.
