Abstract (en)

[origin: WO2012041747A1] The invention discloses a welding method, in particular a laser welding method, for connecting a first work piece (10) to a second work piece (11). In a first method step (1), the first and the second work piece (10, 11) are brought into contact with each other, in a second method step (2) a desired welding distortion is determined, and in a third method step (3) the first and the second work piece (10, 11) are welded together depending on said welding distortion, and/or in a third method step (3) the first and the second work piece (10, 11) are rotated about a rotational axis (16) at a rotational speed, the first and the second work piece being welded together in said third method step depending on the rotational speed.
