Abstract (en)

[origin: WO2012041680A2] A system and method for offshore rescue of an object from an offshore installation (8) comprising the components: a first vessel (1) equipped with a stabilizing system (2, 3), an operating lifting device (4), a connecting system (5) suitable for connecting the crate (6) to the end of the operating lifting device (4), and a crate (6) connected to a lowering device (7), in which the combined interaction of the components enables the transfer of the at least one object between the first vessel (1) and an offshore installation (8).
